Instructions for Alternative Minimum Tax

Individual taxpayers are subject to a Colorado alternative minimum tax equal to the amount by which 3.47% of their Colorado alternative minimum taxable income exceeds their Colorado normal tax.

Colorado alternative minimum taxable income is the federal alternative minimum taxable income modified by any applicable additions and subtractions. Enter on line 2 of form DR 0104AMT the sum of lines 3 through 7 and line 9 from form DR 0104. Enter on line 4 of form DR 0104AMT the sum of all subtractions entered on the DR 0104AD excluding the State Income Tax Refund (line 1, DR 0104AD) and any interest paid by the State of Colorado or any political subdivision thereof that is in federal alternative minimum taxable income. On DR 0104AMT - Computation Schedule, do not enter any amount on line 2 or line 4 that duplicates any income or adjustment made in arriving at federal alternative minimum taxable income.

For additional information about calculating Colorado alternative minimum tax, please review the Individual Income Tax Guide at Tax.Colorado.gov.

Ordinarily, you will have a Colorado alternative minimum tax if you have a federal alternative minimum tax.

Part-Year and Nonresidents

In the case of a nonresident, the Colorado alternative minimum tax shall be apportioned in the ratio of the modified federal alternative minimum taxable income from Colorado sources to the total modified federal alternative minimum taxable income. In the case of a part-year resident, the Colorado alternative minimum tax shall be apportioned in the ratio of the modified federal alternative minimum taxable income applicable to that part of the year the taxpayer was a resident plus the modified federal alternative minimum taxable income from Colorado sources, if any, during that part of the year the taxpayer was a nonresident over the total modified federal alternative minimum taxable income.

Apportion itemized deductions (excluding any deducted state and local taxes) to Colorado by multiplying them by the ratio of Colorado adjusted gross income to total adjusted gross income. This apportionment fraction may be calculated by dividing the amount on line 25 of form DR 0104PN (Colorado adjusted gross income) by the amount on line 24 of form DR 0104PN (federal adjusted gross income). Subtract the apportioned itemized deductions from Colorado adjusted gross income (line 25 of form DR 0104PN) and enter the result in the Colorado column of line 1 of the worksheet below.

Adjustments relative to the standard deduction and itemized deductions would be Colorado adjustments to the extent of the Colorado adjusted gross income ratio as determined on line 34 of form DR 0104PN. Other adjustments would be Colorado adjustments to the extent they relate to items of income from Colorado sources. Tax preference items are Colorado items to the extent they relate to a business being carried on in Colorado.

Additions and subtractions are allocated to Colorado in the following worksheet in the same manner as on form DR 0104PN. Please see Department publication Income Tax Topics: Part-Year Residents & Nonresidents for additional information.

Use the worksheet below to calculate the apportionment percentage if you are a part-year resident or nonresident individual. Carry the percentage from line 10 of the worksheet to line 6 of the DR 0104AMT.
