

Location/Jurisdiction Codes for Sales Tax Filing

Sales tax filers with one or more locations/sites may file on Revenue Online ([Colorado.gov/RevenueOnline](https://colorado.gov/RevenueOnline)), by XML (Extensible Markup Language) or through the new SUTS portal ([Colorado.gov/Revenue/SUTS](https://colorado.gov/Revenue/SUTS)), which can also file most Home Rule Self Collected Cities in a single return. A list of XML approved software vendors is available at [Tax.Colorado.gov/file-sales-tax-online](https://tax.colorado.gov/file-sales-tax-online). Use of Department approved XML software does not require individual approval. Filers with multiple locations/sites may file using the provided spreadsheet template, see [Tax.Colorado.gov/sales-tax-spreadsheet-filing](https://tax.colorado.gov/sales-tax-spreadsheet-filing). Use of the spreadsheet requires pre-approval by the Department. The SUTS portal does not require pre-approval, please see [Tax.Colorado.gov/SUTS-help](https://tax.colorado.gov/SUTS-help) for more information on the SUTS system.

When you file sales tax returns by paper or XML/Excel spreadsheet, you must use the six digit location/ jurisdiction codes. The location/jurisdiction code is determined by the location address of the actual physical site location or place of delivery.

Note: For sales made in unincorporated areas of any Colorado county (not within any city or town), use the county code and the code "0206", which is a generic designation. The designation of an unincorporated area must be verified with the county assessor's office. In areas that have a special district associated with unincorporated areas of a county the department has noted those areas as "0208" for a better understanding of unincorporated areas that still have a special districts collection needed. For example, for sales in unincorporated Arapahoe County, use the code 10-0208 because SCFD is associated with the entire county. For businesses such as telecommunication or utility companies that make sales in unincorporated areas of any Colorado county but do not have a physical location in such areas, the Department

has removed the use the code "0207" and taxpayers simply need to use the "0206" or "0208" when appropriate.

To add non-physical locations and physical locations for the state-collected jurisdictions in Colorado:

1. Identify the jurisdiction you need to add.
2. If you are a registered user, log in to Revenue Online. On the Sales Tax page, in the "I Want To", click on "Add Non-Physical Locations." If you are an unregistered user, click on "Retailers with NO physical presence in Colorado" on Revenue Online Homepage.
3. Follow the steps to add non-physical locations to your sales tax account.
4. Once you have completed your request, you will receive an email confirmation.

SUTS System allows businesses to easily, and with the aid of free technology, identify the correct taxing jurisdictions related to the sale of a taxable goods or service. The Geographic Information System (GIS, see [Tax.Colorado.gov/GIS](https://tax.colorado.gov/GIS)) now allows businesses to look up the specific sales tax rate for an individual address. The GIS not only shows state sales tax information, but it also includes sales tax information for counties, municipalities, and special taxation districts. This system allows for a complete tax rate to be determined so the correct tax is collected from customers in real-time.

Also, if your internal point of sale (POS) system supports it, the GIS information can be accessed through an Application Programming Interface (API). See [Tax.Colorado.gov/GIS-API](https://tax.colorado.gov/GIS-API). This API can automatically reference current tax information directly from the Department. Please note you will need to register for an account with SUTS before using the API.
